Cultivating Young Minds with STE(A)M

Week 2

Thank you to everyone that came out to our picnic on June 26. If you could not make it, don't worry! We will be having another picnic towards the end of our summer programming.

Our children are busy learning, yet they are still having so much fun! It's exciting to walk into the classrooms and see them completely engaged in a project. We are not sure how much they have told you, but this is not your average summer school. Students are learning by using different technologies. There is very little use of pens and pencils.

Students move around quite a bit with our STE(A)M approach of learning. We ask that they please wear **TENNIS SHOES**.

Students that attend our after-school program are staying busy with myON, Art, STEM Challenges, and Gym. Our art project this week consisted of making Huichol beaded masks. They are all unique! Our students are quite the artists! Don't worry, you will see them too. All art projects will be sent home with your child.

Families of Preschool and Kindergarten Students, please send in a change of clothing. We will keep them here in the event of any accidents!

Take Note

Parents or Guardians, please remember that, if you have a change in phone number, address, or emergency number, you need to send us the new information. As a reminder, our office phone number is 574-231-5848.

Due to some scheduling issues, our eye screenings have been rescheduled. We will have eye screenings in July.

Classroom Spotlight

ART

Kindergarten and 1st Grade – This week our younger ones used the GoPros to create videos. They were able to use the videos to recall stories and to learn the concept of time.

Ollie

Drone

Sphero

GoPro

MakerBot

iPad Mini
